Ian Ho

917-288-8729 | ianho@stanford.edu | ianaho.github.io | Google Scholar

Research Interests

Biological Fluid Mechanics, Physical Computing, Active Matter, Interfacial Phenomena

Education

Stanford University, School of Engineering — **Stanford, CA**
Ph.D. Biological Engineering — *2021-*
Advisor: Manu Prakash

Stanford University, School of Engineering — **Stanford, CA**
M.Sc. Biological Engineering — *2021-2023*

Brown University, School of Engineering — **Providence, RI**
B.Sc. Mechanical Engineering (Honors) — *2017-2021*
Research Advisor: Daniel Harris

Research Experience

Prakash Lab (Stanford University) — **Stanford, CA**
Graduate Research — Advisor: Prof. Manu Prakash — *2022-*

- **Coral Larvae Swimming Behavioral**
  - 3D long-term tracking across the larval life cycle quantifies swimming states and transitions that shape dispersal strategies [1].
- **Parasite Interfacial Swimming**
  - Identified and modeled a novel interfacial swimming mode in schistosome larvae that enhances near-surface transport and dispersal [2].
- **Self-learning Mechanical Circuits**
  - Realized unsupervised learning in elastic networks where spring stiffness adapts as the learning degree of freedom, enabling programmable mechanical memory [3].

Harris Lab (Brown University) — **Providence, RI**
Undergraduate Research — Advisor: Prof. Daniel Harris — *2018–2021*

- **Self Propulsion and Collective Interaction of Capillary Surfers**
  - Established a capillary-wave-driven active-matter system of "surfer" particles with tunable self-propulsion and wave-mediated interactions [5,6].
- **Direct Measurement of Capillary Attraction**
  - Developed a magnetic force measurement platform to directly measure capillary attraction between floating cylinders [9].
- **Interfacial Drag on Floating Bodies**
  - Quantified skin-friction drag for centimeter-scale disks sliding on the air–water interface, isolating boundary-layer contributions [10].

Breuer Lab (Brown University) — **Providence, RI**
Independent Study — Advisor: Prof. Kenny Breuer — *2020–2021*

- **Energy Harvesting with Flexible Hydrofoils**
  - Measured how a flexible tip alters heaving–pitching hydrofoil dynamics and boosts energy-harvesting performance [8].

Fellowships

Tau Beta Pi Fellowship (Stark No. 42): Among 28 selected, 2021-2022. [Link]

Awards and Honors

Poster award: Stanford Bio-X Interdisciplinary Initiatives Seed Grants Program Poster Session (25/229). [Link]

Stanford Bio-X Travel Award: Travel award to attend APS March Meeting, 2023. [Link]

Outstanding Senior Award in Mechanical Engineering: Brown School of Engineering, 2021. [Link]

Sigma Xi Honor Society: Inducted 2021.

Karen T. Romer Undergraduate Teaching and Research Award: Awarded to conduct research at Brown University, 2019.

Tau Beta Pi Engineering Honor Society: Awarded to top 1/8 of Engineering Class, inducted 2019. [Link]

Teaching Experience

Physiology: Modern Cell Biology — Marine Biological Laboratory (MBL) — **Woods Hole, MA**
Teaching Assistant [Link] — *2025*

BIOE 271 Frugal Science — Stanford University — **Stanford, CA**
Teaching Assistant — *2023,2024,2025*

ENGN 1735 Vibration of Mechanical Systems — Brown University **Providence, RI**
Teaching Assistant, Course Development [7] *2021*

ENGN 1860 Advanced Fluid Mechanics — Brown University **Providence, RI**
Teaching Assistant *2020*

Summer@Brown "Fluid Mechanics Through Hovercraft Physics" — Brown University **Providence, RI**
Co-instructor *2018*

APMA 340 Ordinary Differential Equations **Providence, RI**
Teaching Assistant *2018*

Field Research

2023: *R/V Atlantic Explorer (Bermuda)* — Tracking microscopy measurements of acantharian sedimentation.
2022: *R/V Sikuliaq (Alaska)* — Measurements of centric diatom buoyancy-regulation behavior.
